... touch the difference

KSK-3211 BTM

The KSK-3211 BTM is, thanks to its super-mini layout, very slim and small, but still offers all common characters and symbols besides a NumPad. It features eight multimedia hotkeys.
The mouse function in the form of a trackball and two mouse buttons complete the picture of the keyboard.
The keyboard can be connected by using the Bluetooth connection as well as using a Micro USB cable. This cable also enables the possibility to charge the keyboard if rechargable batteries are used.
